Subject: Re: Meeting Reminder - North Center North Lindstrom Channel Restoration Feasibility Task Force

Hi,

To prepare for the meeting tomorrow, I have been reading through the past plans, correspondence, etc. and have a question that I hope that you can clarify for me. In a number of places there has been the statement indicating that we would have to get the permission of all of the property owners (riparian rights) to be able to implement some of the different concepts.

What rule requires this permission? I have been reading Rule 6115.0221 and it looks to me that if this project is sponsored by a governmental unit (the county or the LID?) that this permission would not be required. Please let me know if I am missing something here?

Thanks

Gary Schumacher
